

The A300 Sport.Tool is the first performance measuring tool developed specifically for for skiers. All information that makes skiing so much fun is displayed with GPS accuracy. Want to know who is the fastest downhill? The A300 will tell you. Who has skied the highest mileage on the runs? The A300 measures the distance uncompromisingly. Only the A300 can do this: The ski lift rides are excluded in the distance calculation

Optimized for: Skiing

Also suitable for: Snowboarding, cross-country skiing and hiking

- > Ultra precise measurement of the current, maximum and average speeds via GPS
- > Measurement of the distance skied (distances on ski lifts are automatically excluded)
- > Altitude measurement via GPS
- > Automatic timer
- > Easy operation with only two buttons

A300 Features

- Maximum speed
- Current speed
- Average speed
- Distance skied (If required, ski lift distances are excluded)
- Automatic timer
- Automatic recording of downhill runs (max. 50) (For each run the distance and time are stored and can be recalled later.)
- Current altitude (GPS)
- Cumulative altitude difference (GPS)
- Time (ultra precise GPS satellite atomic time)
- Date
- Changeable cover

A300 Technical Specifications

- Battery life up to approx. 10 hrs
- Water resistant
- Battery indicator
- Temperature range -10°C to +50°C
- Dimensions WxHxD: 79 x 78 x 27 mm
- Weight approx. 120g (incl. battery and arm strap)
- Speed accuracy +/- 0.3 km/h
- Distance measuring accuracy +/- 2%

Box contents

- A300 Sport.Tool
- Arm strap
- 1 x AA battery
- Quick Start Guide
- User manual
- Product registration card
