

How many knots? Which heading?  
Now you know.™

Who was fastest on the water today? Now there is no more guessing, but precise measurement. The Navman M300 Sport.Tool has been specifically optimized to meet the requirements of water sports enthusiasts. With accurate speed measurement, distance sailed, display speed in nautical miles or knots, and the heading is accurate to a couple of degrees. All the M300 Sport.Tools are reliably water resistant.

**Optimized for:** Windsurfing and sailing

**Also suitable for:** Leisure boating, jet skiing and water skiing

- > Ultra precise measurement of the current, maximum and average speed via GPS
- > Speed displayed in nautical miles and knots or kilometers and km/h
- > Lap history
- > Heading
